

Cleisson de Oliveira Moura

Team Lead & Senior Software Engineer | Backend, AWS, Kubernetes & AI

Brazil • contact@cleisson.com • linkedin.com/in/cleissonom • cleisson.com • github.com/cleissonom

Professional Summary

Team Lead and Senior Software Engineer specializing in backend systems, cloud infrastructure, distributed architectures, and AI-enabled products. Designs and ships production software with Python, Node.js, AWS, Kubernetes, event-driven systems, CI/CD, and infrastructure as code across startup and international remote environments.

Core Skills

Backend & Languages: Python, Node.js, TypeScript, JavaScript, Django, Django REST Framework, REST APIs, background workers, system design, service boundaries, Rust, C.

Cloud, DevOps & Delivery: AWS, EKS, Kubernetes, Docker, AWS CDK, Terraform, Helm, RDS, SSM, Octopus Deploy, GitHub Actions, shell automation, CI/CD.

Distributed Systems, Data & AI: SQS, SNS, EventBridge, Redis, PostgreSQL, Celery, ClickHouse, graph databases, caching, queues, reliability, OpenAI, Perplexity, Anthropic, AWS Bedrock.

Professional Experience

Productera LLC

United States - Remote

Team Lead

May 2024 - Present

- **Role progression:** Team Lead (Jun 2026 - Present); Senior Software Engineer, Encore (Jul 2024 - Jun 2026); Software Engineer, ThirdEdition (May 2024 - Jul 2024).
- Led the migration of a Django monolith to Python microservices on AWS EKS; designed services with RDS, Bedrock, SSM, SQS, and EventBridge, improving scalability, deployment reliability, and service ownership.
- Standardized infrastructure and delivery with AWS CDK, Terraform, Helm, Octopus Deploy, Kubernetes manifests, GitHub Actions, and shell automation.
- Architected event-driven processing with SQS, SNS, Redis caching, background workers, and distributed workloads, contributing to performance, compliance, and production reliability.
- Built AI features for transcription, highlighting, transformation, summarization, and automation using OpenAI, Perplexity, and Anthropic via Bedrock; previously planned ThirdEdition's AWS/Terraform infrastructure and owned front-end technology decisions.

MeMima.com.br

Brazil - Remote

Software Engineer

Jul 2023 - Feb 2025

- Helped launch and evolve an early-stage product that reached 2,000+ active users within its first few months, contributing to strategy, product ideation, user flows, and continuous delivery.
- Integrated payment gateways, chat, graph-based recommendations, scalable AWS infrastructure, and AI-assisted photo workflows for age verification and facial recognition.

Avanti E-commerce and Digital Marketing

Florianopolis, SC, Brazil - Remote / On-site

Software Engineer / Software Engineering Intern

Aug 2022 - May 2024

- Built React Native/Expo e-commerce applications and supported App Store and Play Store releases for GOL, Copenhagen, and Intelbras, serving 150+ users.
- Built Django/DRF APIs with PostgreSQL and Heroku; integrated Firebase Analytics, VTEX Orders, WordPress, RD Station, AWS SNS/SES, Celery, and Firebase Cloud Messaging while progressing from R&D into software engineering.

Selected Projects & Technical Writing

- **DevImg | Rust, GitHub Actions:** Published a CLI and reusable library on crates.io, plus a public GitHub Action with checksum-verified binaries, content-hashed outputs, manifests, review artifacts, and CI freshness/budget checks.
- **AccessTrace | TypeScript, ClickHouse, PostgreSQL:** Building a security analytics prototype that turns synthetic SaaS, self-hosted, and local MCP audit events into investigation workflows.
- **Website & Technical Writing | Next.js, React, TypeScript:** Built a multilingual portfolio with validated Markdown, sitemap, RSS/Atom/JSON feeds, metadata, and JSON-LD; writes about Kubernetes on AWS, rollout safety, reliable Node.js services, observability, SLOs, and implementation planning.
- **CLI Tools Collection | Rust, C, libcurl, Make, Shell:** Built five tools for image processing, Python paste workflows, raw HTTP requests, and currency-aware earnings/report automation, with shared builds, installers, and targeted tests.

Education & Languages

IFSC - Instituto Federal de Santa Catarina

Brazil

Coursework toward a B.Tech. in Information Technology

Apr 2022 - Jul 2024

Management (not completed)

Languages: Portuguese (native/bilingual); English (advanced/full professional); Spanish (intermediate/professional working).
